## Applications Developed

### Student Grade Table - [Live](#) | [Github](#)

- **Content Management System(CMS)** that allows to create, read, update and delete student grade information from database. **(CRUD)**
- Utilized **CSS3 Bootstrap** to create mobile and desktop responsive **HTML5** skeleton.
- Constructed with **Firestore** Database that allows users CRUD operations
- Built using **ReactJS**, **ReduxJS** and **ReduxForm**.

### Run Buddy - [Live](#) | [Github](#)

- Running application that finds running trails based on user input or user location.
- Utilized **Javascript**, **jQuery**, and **AJAX** to **APIs** to populate list of running trails and their reviews, **Google Maps** to display user location and directions to running trails, as well as display all trails in surrounding area based on user location.
- **Mobile Responsive** for users that are looking to use the application anywhere they go.

### Saige Home Remedies - [Live](#) | [Github](#)

- Built with mobile first in mind, using **ReactJS**, **ReduxJS**, **HTML5** and **CSS3 Flexbox**.
- Used **MySQL** database and **PHP** to store and retrieve remedies and their information.
- Features user sign up that allows reviews on any remedies chosen.
- Weekly stand ups and **Trello** used to keep track of project developed with **agile** methodology.

## Professional Experience

### Logistics Manager | Target

06/2016 - 04/2018

- Promotion to Logistics Manager from Senior Team Leader
- Performed managerial shifts, which included overseeing total store operations in \$50 million dollar store.
- Provide ongoing staff development to employees including recognition and feedback.
- Managed day to day operations of over 50 employees engaged in sales, inventory-taking, logistics, and replenishment.
